SHOWERSHAPES® FROM GW SURFACES

In keeping with our 40-year tradition of providing innovative and quality products, competitive pricing, and specialized service, GW Surfaces is proud to represent ShowerShapes® products manufactured from LG HI-MACS®.

Toilet Partitions,

Shower Floors - Approved by the NAHB Research Center
and Self-Draining Countertops.

ShowerShapes® products are Attractive, Cost-Effective, and Maintenance Free.

Utilizing technology from GW Surfaces - a recognized industry leader in design, engineering and manufacturing techniques - ShowerShapes® offers a departure from conventional public restroom and locker room area applications.

Combining the look and feel of stone or granite, with the lasting durability of LG HI-MACS®, the uncompromising craftsmanship of ShowerShapes® provides you with products that are:

Safe, Practical, Extremely Functional, and Easy to Specify, Install and Maintain.

And, all are manufactured to exact customer specifications without compromising design freedom and day-to-day performance.

ShowerShapes® innovative engineering and patented technology - along with the exceptional performance of LG HI-MACS® - is what sets products apart from all others.

Gone forever, are problems associated with mold and mildew, scratched-in graffiti, and rust, dents, peeling, and chips, because ShowerShapes® products are nonporous and stain resistant.

Quite frankly, the competition just doesn't shape up!

ShowerShapes® is designed for:

- Airports
- Fire and Police Stations
- Health Clubs/Spas
- Hospitals/Clinics Hotels/Motels/Inns
- Military Bases
- Office Buildings
- Restaurants
- Schools/Colleges Stadiums/Arenas
- Theme Parks and more...

All ShowerShapes products meet the Class Fire Rating and are ADA Compliant.

TOILET PARTITION SYSTEMS

ShowerShapes® offers you a welcome departure from conventional partitions.

They are more practical, durable and longer lasting and require far less maintenance than conventional designs. That's why they are exceptionally cost effective over the life of the system especially when compared with steel, FRP and phenolic partitions.

An integral hardware mounting system is fully concealed behind sleek LG HI-MACS® surfaces, eliminating many hard to clean areas that trap dirt and become increasingly troublesome throughout the years.

Divider panels, pilasters, hinges and doors are reinforced with tamper-resistant structural stainless steel. There are no screws or bolts that pull loose over time.

These Toilet Partition Systems:

Meet Class I Fire Rating, are ADA Compliant, and comply with CSI, AIA Masterspec, Specsintact and Corps of Engineers' formats. All formats are available in both electronic and hard copy versions, and coordinate with ShowerShapes® Self-Draining Countertops and Shower Floors.

Standard Configuration Features:

- Floor-mounted pilasters.
- 58" x 58" divider panels, 24" wide x 58" high doors,
- 72" high x 58" deep stall
- Doors hinged to swing inward (ADA doors will swing out).
- 72" high pilasters,

SHOWER FLOORS

ShowerShapes® features shower floors that:

Match your design creativity,

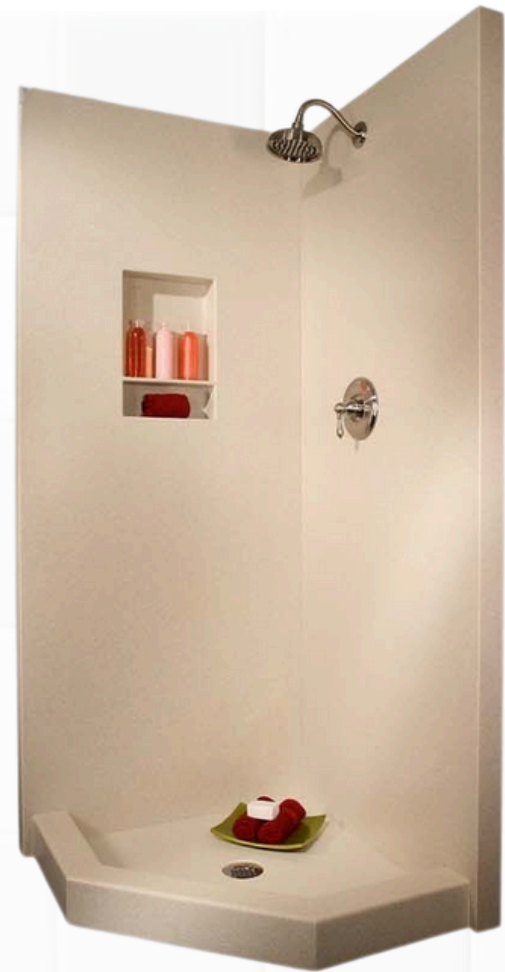

Resolve construction problems, and minimize maintenance.

Available for ADA, commercial and residential applications

these floors can be adapted to any shape, size, drain location and LG HI-MACS® color combination.

FEATURES:

- One-piece fabrication designed for easy installation of single or multiple thresholds, including barrier-free accessibility.
- Drain connections utilizing standard plumbing industry fittings for consistency throughout the country.

Complete Floor and Wall Panel Systems

Variety of Styles Available

Neo-Angle Shower Pan

- Customer-placed drain locations.
- Drainage slope built into the floor at 1/4" per foot fall.
- Non-porous surface that is stain and scratch resistant and will not support microbial or viral growth.
- Slip resistant floor finish.
- Testing and approval by the NAHB Research Center to surpass standards set by the Uniform Plumbing Code Section 909.2 and ANSI Specification #Z-124-2.

Barrier-free Designs

SELF-DRAINING COUNTERTOPS

The Most Functional Countertop Available

Simply stated, this Self-Draining Counter Top with a built-in drainage slope, one-piece coved backsplash and non-drip edge, can resolve your major maintenance and liability problems.

Available in Single and Double Bowl Designs

Splashed water automatically drains into the bowl, eliminating standing water on the counter, and the coved backsplash and non-drip edge help prevent spillage onto the floor... all of this from a product that looks beautiful, is clean and is color coordinated to your overall design scheme.

Non-Drip Edge

Caved Backsplash

- These counter tops are available in all LG HI-MACS® colors.
- Your choice of single or multiple bowls and custom designs and sizes.
- The Self-Draining Countertop meets the Class | Fire Rating, and is ADA compliant.

CUSTOMER ORDER REQUIREMENTS

TOILET PARTITIONS:

All orders are manufactured to meet your requirements. A sketch or drawing is required.

This drawing must include the following:

- Centerlines or water closets
- Front-to-back wall depth
- Color requirements
- (Note: Where widths of compartments are specified, these will be considered to be the centerline of the divider panels)

For ADA compliant compartments, mounting locations of grab bars must also be indicated (divider-mounted grab bars require a custom LG HI-MACS divider panel). Prior to manufacturing, a plan and elevation drawing will be issued by GW Surfaces for your approval to confirm the design, layout and all dimensions. The partitions cannot be made without this approval. The person placing the order is responsible for the accuracy of all dimensions.

Responsibility for compliance of the design to ADA requirements is solely that of the person placing the order.

Deviations from the standard configuration must be called out on customer drawings or in customer specifications at the time the order is placed.

SHOWER FLOORS:

All orders are manufactured to meet your requirements. A sketch or drawing is required for each floor showing the size of the floor as well as the location of the drain. Color and any special details must also be listed.

For ADA compliant installations contact GW Surfaces for layout details. Floors will only be made from a shop drawing supplied by you. Accuracy for all dimensions and layout are the responsibility of the customer.

SELF-DRAINING COUNTERTOPS:

All orders are manufactured to meet your requirements. A sketch or drawing is required unless standard units are ordered. This drawing must include the following:

- Countertop Depth, width and bowl placement
- Backsplash height
- Edge detail
- Faucet drilling locations for each top
- Color requirements

For ADA compliant applications, contact GW Surfaces for layout details. Prior to manufacturing, a shop drawing will be issued by GW Surfaces for your approval. The tops cannot be made without this approval. The person placing the order is responsible for the accuracy of all dimensions.
